

SIMATS ENGINEERING

ASSESSMENT TOOL 1

COURSE NAME: INTERNET PROGRAMMING
COURSE CODE: CSA43

COURSE OUTCOME COVERED

CO-2 : Apply CSS layout and styling techniques to create visually appealing and responsive web interfaces, and use JavaScript to enable interactive client-side behavior. (L3)

Assessment Tool : Integrated Experiments

Weightage: 40%

QUESTIONS:

Total Marks: 30

Experiment 1: Responsive Layout Design

Suppose that a retail website is not responsive across mobile and tablet devices, causing misalignment of content and improper spacing.

- (a) Analyze the possible reasons for lack of responsiveness in the existing layout.
- (b) Design a responsive webpage layout using **CSS Flexbox or Grid**, ensuring proper alignment of header, navigation, content, and footer.
- (c) Demonstrate how the layout adapts to **different screen sizes (mobile, tablet, desktop)** using media queries.
- (d) Implement spacing, alignment, and distribution techniques to improve visual consistency.
- (e) Evaluate the effectiveness of the responsive design and suggest further improvements.

Experiment 2: Form Validation using JavaScript

Suppose that a registration form accepts invalid email and phone number inputs, leading to incorrect data submission.

- Analyze the issues in the existing form validation mechanism.
- Design input fields for email and phone number with appropriate HTML attributes.
- Implement **JavaScript validation using Regular Expressions** for both email and phone number.
- Develop a mechanism to display **real-time error messages** for invalid inputs.
- Evaluate the validation system and suggest enhancements for better user experience and security.

The screenshot shows a web browser window with the title 'Form Validation'. The page displays a 'Registration Form' with two input fields. The 'Email' field contains 'tejashwi@gmail.' and has a red error message 'Invalid Email' below it. The 'Phone Number' field contains '123456666' and has a red error message 'Enter 10-digit Phone Number' below it. A blue 'Register' button is at the bottom of the form.

The screenshot shows a web browser window with the title 'Form Validation'. The page displays a 'Registration Form' with two input fields. The 'Email' field contains 'tejashwi@gmail.com' and the 'Phone Number' field contains '1234566668'. A blue 'Register' button is at the bottom of the form.

Experiment 3: CSS Layout Debugging

Suppose that a webpage layout overlaps when the browser window is resized, affecting usability.

- (a) Analyze the CSS properties responsible for layout overlapping issues.
- (b) Examine the role of the **CSS box model (margin, border, padding, content)** in layout design.
- (c) Debug the layout using appropriate **positioning techniques (relative, absolute, flex, grid)**.
- (d) Modify the CSS to ensure proper alignment and prevent overlapping during resizing.
- (e) Evaluate the corrected layout and suggest best practices for maintaining consistency.

Code of Conduct:

I C. Tejashwi (192372043) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

RUBRICS FOR CALCULATION:

Criteria	Weightage	Level 4 – Exemplary	Level 3 – Proficient	Level 2 – Developing	Level 1 – Beginning
Understanding of Concepts	25	Demonstrates thorough understanding and effectively integrates multiple concepts/technologies	Good understanding with proper integration of most concepts	Basic understanding; limited or partial integration	Poor understanding; unable to integrate concepts
Experimental Design	30	Well-planned, systematic implementation with optimal solution	Correct implementation with minor issues	Basic implementation with errors or inefficiencies	Incorrect or incomplete implementation
Use of Tools	20	Effective and advanced use of tools/technologies with proper configuration	Appropriate use of tools with correct execution	Limited or inconsistent use of tools	Incorrect or minimal use of tools
Analysis of Results	15	Insightful analysis with accurate interpretation and validation of results	Good analysis with reasonable interpretation	Basic analysis with limited insights	Poor or incorrect analysis of results
Documentation	10	Clear, well-structured documentation with diagrams, code, and results	Organized documentation with necessary details	Basic documentation with missing details	Poor or incomplete documentation
